

26 P

Programmable Roll Slitting Machine

The 26P is the answer to fast and precise roll slitting. Equipped with two steel rollers to support the material, has been design to cut the most varied materials into strips, as textiles, non woven, carpets, synthetic leather, adhesives, fiber glass, PVC etc.

- PLC controlled
- Programming system of the cut and widths
- Programmable blade sharpening
- Variable roll speed
- Equipped with two steel rollers to support the material
- Cutting head positioning through encoder
- Blade and in-depth speed variator
- Reversible roll rotation
- Programmable blade lubricator
