

Advantage TS Tubular Spreading Machine

The ADVANTAGE TS is a robust machine specially designed to spread tubular fabrics of different width.

The machine has different calander sizes to open the fabric without creases and perfect alignment the material perfectly. The feeding roller allow to spread the fabric face to face without tension and end clamps.

- Permits tubular fabric spreading directly from the pallet.
- High productivity.
- Reduction of inventory losses and loading times.
- Real-time tension control.
- Available up to 500 kg.
