

Series 601 Pull • Cut • Stack Systems

An engineered family of machines to meet all face up spread and cut requirements.

Each system is modular and is built with up to six components:

- A pre-loading table for the front end feeder.
- A front end feeder, with or without edge control weight capacities up to 1000 lb.
- A cutting system.
- A puller, either manual or automatic, running on a cutting table.
- A multi-knife slitter for running slits.
- An excess fabric rewind system.

All components are electronically controlled and integrated by a state of the art control system, with touch screen.

Standard machines up to 120 inch fabric width. Wider machines available on request.

With all the options available, you are not limited to a machine's capabilities. Intercut 601 machines are custom built for your requirements.
