

Intricate markers, one of a kind patterns, samples, reworks, even plastic and rubber sheeting are all big problems in any cutting room... unless an Eastman lightweight rotary shear is at hand.

Offering the ultimate in maneuverability, these Eastman knives are the solution to those low quantity cutting jobs common to the industry.

Chickadee®/Model D2

The smallest round knife available, the Chickadee® II replaces hand held shears. Powered by Eastman's Perma-Field Motor, the Chickadee II has 40% more power than any other hand held knife its size. This, combined with its streamlined, lightweight construction, helps eliminate operator fatigue. Equipped with either a round blade for general use or a hexagon blade for sheer or difficult to cut cloth, the Chickadee II has a cutting capacity 25% greater than competitive models.

The Chickadee II also features a totally enclosed sharpener for faster and safer sharpening, easily accessible motor brushes for quick and easy servicing and an integrated power switch for rapid response and fatigue free operation. The Eastman Chickadee II is versatile too. Four different base plates and cutting tips can be selected depending on your specific use.

- Stabilizer Shoe: The standard foot attachment, a utility feature that lends itself well to all cutting and slitting operations.
- Ball Tip: Best when slitting tubular knits or other loosely woven materials.
- Broad Stabilizer: For those ap-

plications where slightly more stability is necessary, useful for eliminating distortion between plies.

- Baseplate: A small baseplate fitted with needle rollers to create the lightest free standing rotary shear available. Provides the greatest degree of accuracy from top to bottom ply.

Long Handle Chickadee® Model D2H

Encapsulating all the features of the D2, with the addition of a long handle and remote power switch. The ideal companion to any spreading machine for cutting out flaws or when laying up fabrics.

Rotary Shears & Small Round Knives

Eastman lightweight rotary shears are the best solution for cutting intricate markers, one-of-a-kind patterns, samples, reworks, and plastic or rubber sheeting. Offering the ultimate in maneuverability, Eastman rotary shears are the answer for short run cutting jobs common in the industry.

Eastman's line of small round knife machines set the standard for the cutting industry by providing agility, power, and versatility. Each small round knife has a low profile baseplate which allows for virtually no distortion when cutting through low lays, or single thickness, of material.

accurate smooth efficient

Chickadee MODEL D2

The Chickadee is the smallest rotary shear available and is the perfect upgrade to, or replacement for, hand held shears. Powered by Eastman's Perma-Field motor, the Chickadee has 40% more power than any other hand held knife its size. Its streamlined, lightweight, construction helps eliminate operator fatigue.

Other features include:

- 2 1/4" (5.72 cm) round blade for general use or hexagon blade for sheer or difficult to cut cloth.
- Cutting capacity is 25% greater than competitive models.
- Built-in sharpener.
- Ergonomically designed
- Three different base plates and cutting tips can be selected:
 - Stabilizer Shoe: the "standard" foot attachment, a utility feature that lends itself well to all cutting and slitting operations.
 - Ball Tip: best when slitting tubular knits or other loosely woven materials.
 - Baseplate: a small baseplate fitted with needle rollers to create a lightweight, freestanding rotary shear; provides the greatest degree of accuracy from top to bottom ply.

Long Handled Chickadee MODEL D2H

Has all the features of the D2 model, in addition to a long handle and a remote power switch. This is the ideal companion to any spreading machine for cutting out flaws, or when laying up fabrics; this allows the operator to reach across the table with ease, thereby improving cutting quality.

Mini Cutter MODEL MC-8

The Eastman MC-8 Mini-Cutter is a cordless cutter perfect for all light duty cutting needs. It slices through all fabric, paper, and leather materials easily. The MC-8 features a cordless, rechargeable system and can also operate with AC power.

Buzzaird Pneumatic Shear MODEL BZ

The Buzzaird is designed with a 20,000 RPM pneumatic motor suitable for wet environments. It is an extremely powerful rotary shear suitable for cutting single-ply leather, rubber, plastics, woven glass, coated materials, and much more. Available options include a Pelican head or swivel sharpener. Optional swivel sharpener is equipped with a 30 degree ball tip shear plate for close edge trimming.

Workerbee MODEL WB

The Workerbee is a powerful, professional grade, cordless rotary shear. It is designed with the same precision cutting features as our standard rotary shears but with the convenience and portability that is afforded by battery power. The Workerbee is equipped with a 2-1/2" (5.16 cm) blade and a 7.2 volt battery pack - allowing for longer run time between charges.

Workerbee Pelican MODEL WB-3M

The Workerbee Pelican is designed to cut lofted materials with ease. The Pelican head is available on the Buzzaird air-powered shear as well.

Little Giant MODEL BBB32

The Little Giant model BBB32 features a 3 1/4" (8.26 cm) blade and a premium quality high torque universal motor which maintains its power under heavy loads. This machine is an economical alternative for cutting heavier weight materials such as upholstery and industrial fabrics.

Gentle Giant MODEL BBS32

The BBS32 is Eastman's largest shear, featuring a premium quality, high torque universal motor to cut both lightweight material and heavy-duty fabrics with ease. This machine is an economical alternative for cutting through fine fabrics (such as low ply delicate synthetics) without pulls or damage to the material. The Gentle Giant, like all Eastman round knives, is perfect for cutting large radius curves and straight lines.
